Hello Variance Review Board,

I am planning to build a Two Car Attached Garage on my house as shown in the supplied plans. I wish to do this in order to bring my house up to the same standards as the other houses in the neighborhood and add much needed storage space. The existing shed was in very poor, deteriorating condition and was an eyesore to me and rest of the neighborhood, so the only option was to remove this structure.

My house sits right on Meadowbrook road and is readily visible to passing traffic so I feel it is important to modernize the exterior both for appearance and functionality. Many of my neighbors have this same Two Car Attached Garage feature and adding this will bring my house up to this same standard. Also, like most families, I have two cars, so a Two Car Garage is needed.

This upgrade to my house will beautify the neighborhood and make my house worth more and consequently make the neighbors houses more valuable.

Please give my application for a variance every possible consideration.

I have enclosed pictures with this Email that show the previously existing shed and other neighborhood homes that have similar garages, to give an idea of what my home will look like after construction.

Thank You and Best Regards,

David Hengstebeck
