Case No. PZ12-0049 40399 Grand River Ave.

Location: 40399 Grand River

Zoning District: I-1, Light Industrial District

The applicant is requesting a variance from the CITY OF NOVI, CODE OF ORDINANCES, Section 2400 to allow location of an accessory structure (pavilion) 17.66 ft within the required minimum 100' rear yard setback. The property is located west of Haggerty Road and south of Grand River Avenue.

Ordinance Sections:

CITY OF NOVI, CODE OF ORDINANCES, Section 2400 requires that structures within an I-1 zoning district have a minimum rear yard setback of 100'.

City of Novi Staff Comments:

The petitioner is proposing to install an open picnic style gazebo in the rear yard of an existing commercial building. The structure is proposed to be constructed between the south side of the existing building and the parking access drive. The siting of the buildings on the site limits the opportunities for this provision of this amenity. An existing landscaped berm along the south side of the site protects the adjacent homes to some degree.

Standards for Granting a Dimensional Variance:

A variance may be granted if a practical difficulty exists due to all of the following:

- There are unique circumstances or physical conditions of the property such as narrowness, shallowness, shape, water, topography or similar physical conditions and the need for the variance is not due to the applicant's personal or economic difficulty.
- The need is not self-created.
- Strict compliance with regulations governing area, setback, frontage, height, bulk, density or other dimensional requirements will unreasonably prevent the property owner from using the property for a permitted purpose, or will render conformity with those regulations unnecessarily burdensome.
- The requested variance is the minimum variance necessary to do substantial justice to the applicant as well as to other property owners in the district.
- The requested variance will not cause an adverse impact on surrounding property, property values or the use and enjoyment of the property in the neighborhood or zoning district.

RE: Michigan Division: Kroger Office Pavilion
40399 Grand River Ave.
Novi, Michigan 48375

JSA job # 1146.1

CC: File.

9. State the practical difficulties which prevent conformance with the Zoning Ordinance requirements:

This property is currently zoned I-1, light industrial. The current use of the property is office. When the current owner purchased the property, the previous owner also used the property as offices. The use does not reflect the current zoning of the property. This in turn requires the property owner to abide by a set of zoning requirements that were meant for more intense industrial uses and not office uses.

The proposed pavilion that would encroach in the 100' rear yard setback is not a building or structure that would have a use similar to that of an industrial use. It is merely a covered area outdoors for the employees of the business to be able to go and enjoy their surroundings. It is a place to relax and eat lunch or to have a possible social gathering. There is an existing beautiful landscape buffer between the existing building and the residential area that provides an element of nature for the employees to take in and enjoy.

In the rear yard of the property heading south towards the adjacent R-4 property, there is approximately 40' from the south wall of the building to the parking lot drive. Then, there is the parking lot drive and from there, the landscape buffer between our property and the residence's property. The proposed pavilion would be located within the 40' of rear yard closest to the existing building. This would allow the parking lot drive and more importantly, the landscape buffer to be completely unaffected by the pavilion, maintaining the existing buffer with the R-4 property.

10. Describe any unique circumstances regarding the property (i.e., shape, topography, etc.) which are not common to other properties in the area and which prevent strict compliance with the Zoning Ordinance:

The property directly adjacent to this property to the west is zoned NCC. Their existing use is similar to this property's use yet they are only required to maintain a 20' rear yard setback abutting the R-4 residential district. The proposed pavilion still provides for an 85' rear yard setback which is much greater than the adjacent property's setback. The landscape buffer that was mentioned would not be affected or altered in any way and thus still providing that buffer between this office business and the adjacent residencies.
